

Product Data Sheet

Product Name: UreAxel AG (ARIIX EU AG)

CAS No.: 120-93-4

Molecular Formula: C₃H₆N₂O

Synonyms: Ethylene Urea, 2-Imidazolidinone, Imidazolidone, N, N'-Ethylene urea, 2-Imidazolidone, 2-Oxoimidazolidine

Specifications:

Particulars	Limit
Appearance (color)	White to light yellow crystalline solid
Purity (GC)	98.0% (±1)
Water Solubility (color)	Soluble, Colorless to light yellow
Melting Point	128.0 to 131.0 °C
Water, Loss on Drying :105 ±2°C for 2 hrs.	≤ 3.0 %

Uses:

- Used for the production of dimethylol ethylene urea thermosetting resins in textiles and paper.
- Used as a scavenging agent to reduce the free formaldehyde in phenolic, melamine, glyoxal and urea formaldehyde resin systems for the coatings, construction and textile industries.
- Used in various kinds of formaldehyde removing reagent e.g. For resinous product, high effect formaldehyde removing detergent, long-term formaldehyde dissolution intermediate, formaldehyde removing for leather, rubber, textile coating, and photocatalyst.
- Used in textile anti – crease finish, anti-tearing finish.
- In the flavor and fragrance industry the product is used as release control agent.
- As a raw material it can be used in pesticide.
- In biological industry, it can be used for producing growth regulator for plants, disinfectant, inhibitors, herbicide etc.
- The pharma industry is using the product as intermediate for antibiotics such as Mezlocillin and Azlocillin.
- Used as intermediate of medicine for snail fever and basic material for 3G penicillin.

Packing:

- 25 kg bag
- Custom on request
